

AYESHA ASLAM

Contact: +92 3288102474

E-mail: ayesaslam210@gmail.com

Location: Okara, Pakistan

OBJECTIVE:

Highly skilled and innovative web developer with over [3] years of experience in designing, developing, and maintaining dynamic, user-centric websites and web applications. Adept at leveraging modern technologies such as HTML5, CSS3, JavaScript, React, and Node.js to deliver seamless digital experiences. Seeking to contribute technical expertise and creative problem-solving skills to a forward-thinking organization focused on innovation and growth.

JOURNEY:

My web development journey began with a simple curiosity that led me to learn HTML and CSS to create basic web pages. Gradually, I expanded my skills by diving into JavaScript and modern frameworks like React and Node.js, gaining a deeper understanding of both front-end and back-end development. With each project, I embraced new challenges and crafted creative solutions, which strengthened my technical expertise and problem-solving abilities. Today, I am a dedicated web developer focused on building responsive, user-friendly, and scalable websites that help clients achieve their business goals. My journey is driven by continuous learning and innovation, and I am always eager to explore new technologies and improve my craft.

EXPERIENCE:

❖ **Web Development(Freelancer):**

(Remote | 2024 – Present)

- Developed and customized responsive WordPress websites using Elementor, theme builders, and theme editors.
- Created and managed e-commerce websites using WooCommerce, optimizing user experience and improving product display and checkout processes.
- Integrated third-party plugins and tools to extend website functionality and enhance performance.
- Worked closely with clients to gather requirements, propose design ideas, and deliver tailored solutions aligned with business goals.
- Maintained and updated existing WordPress websites to ensure security, performance, and modern UI/UX standards.

PROJECTS:

Project: SofaDynamix Development
Role: Frontend Developer
Date of project: 30-jan-2024
Link: <https://cognimiatech.com/>

- Developed a dynamic and responsive website for Sofodynamix using VueJs as a Static Site Generator (SSG).
 - Utilized Vite for a fast development build and optimized the deployment process
 - Implemented Bulma CSS framework to create a clean and modern user interface. Ensured the website was fully responsive and accessible across various devices and browsers.
 - Collaborated with the project team to gather requirements, design the website architecture, and execute the development plan.
 - Conducted thorough testing and debugging to ensure a high-quality and user-friendly final product.
